

Annual Report 2021

The year 2020-21 saw the world turning upside down with Covid 19 creating havoc. Though everybody felt the burn but it was the education system which suffered the most. The Covid induced lockdown ravaged the education system with schools closing down and teachers and students struggling to manage the classes online. We too had our tough times, But putting up the brave face and keeping up with our motto “love and serve”, we the Holy Familians did whatever was within our reach and tried not only to give technical support to our teachers but also ensured the doorstep delivery of books to our students living even in the farthest corners of the town.

In view of UNSECO’s recommendations classes were shifted to online mode and both teachers and students were asked to equip themselves with the right kind of technology and system to deal with the situation. As usual, throughout the year 2020-21, academics was kept at forefront and online classes were conducted for all the students (from KG to class 12) right from April onwards. It was only in November, when the norms of lockdown were relaxed that senior classes were once again shifted to offline mode with all the Covid protocol in mind and preparation for upcoming Boards began in full swing. The efforts thus put in, bore fruits and the school got 100 % result for classes 10th and 12th with the top scores being 99% and 98.4% respectively.

Holding up with the idea of Aristotle – “Educating the mind without educating the heart is no education at all”, lessons in value education continued to be given in online mode as well.

Besides taking care of academics, holistic development of the students was ensured by conducting various co-curricular and extra-curricular activities like dance and music classes, drawing and yoga classes etc. in online mode.

Not only were the students taken care off during the pandemic year, but teachers were also given an appropriate platform to grow and explore themselves further. At times by compulsion and at others by choice, teachers were motivated to participate in various online seminars, trainings and orientation programmes organized by CBSE and other private organizations.

And off course, our biggest stakeholders, our parents, were taken into confidence and were kept updated with everything happening around their wards through regular meetings- both in online and offline mode. Here, we will

like to specially thank them for all the cooperation rendered because without their support it would not have been possible for us to carry on with all these activities smoothly.

To conclude we would like to congratulate and thank the management/Principal and staff without whose dynamic, motivating and proactive leadership and participation we would not have been able to achieve our targets in the pandemic year. It was no doubt, their unfailing dedication and desire to accomplish the task, that today we are harvesting the fruits of success.
